

# MIGHTY YIELD

FARMING THE FUTURE

We're committed to giving back to the world what it needs the most, enough food.

At Mighty Yield, we are creating unlimited opportunities and possibilities in agriculture for everyone, everywhere.

## WHO WE ARE

Our team is made up of passionate agricultural experts determined to change the global perspective of hunger and dedicated to bringing attention to the plight of the millions that are undernourished in a world of plenty.

## WHAT WE DO

We are invested in raising the global yield of food crops through our network of farms across 4 continents. Our model ensures that the most yield is achieved for whatever crop we are focused on within a particular region.

## HOW WE DO

Utilizing modern technology and techniques, we are able to increase the agriculture sustainability. Our experience in crop technology and science remains an invaluable resource, guaranteeing increased yield and a steady positive return on every investment.

## ADVANCED FARMING

**TO GUARANTEE THE BEST POSSIBLE RESULTS**

We use only the most advanced techniques and equipment available today to make the most of every opportunity. Measures like climate prediction, disease detection software and soil fertility meters back by the most cutting edge equipment enable us to move toward a brighter future with high-yield crops.

## ECO-FRIENDLY

**TO ENSURE SAFETY OF OUR GLOBAL FUTURE**

We are committed to promoting sustainable agriculture in the regions we operate and across farmers from all corners of the earth. We support farmers with the right resources and required knowledge to apply sustainable farming practices and methods that are profitable, environmentally sound and good for communities.

## INVESTMENT INITIATIVES

**TO ENHANCE HOPES, HARVEST AND OPPORTUNITIES**

We have launched a global agricultural investment initiative where farmers and individual investors are given the opportunity to share our passion to end world hunger and to be our co-investors in every crop cycle we cultivate worldwide.

# WHY AGRICULTURAL PRODUCTIVITY HAS TO BE INCREASED

Global demand and consumption of agricultural crops for food, feed, and fuel is increasing at a rapid pace. This demand for plant materials has been expanding for many years. However, recent increases in meat consumption in emerging economies together with accelerating the use of grain for bio-fuel production in developed countries have placed new pressures on global grain supplies..

Recent estimations by WHO stats that with a world population expected to be at least 9.7 billion people in 2050, the demand for food, feed, fiber, and fuel will likely outpace food production if the current rate of output remains the same.

To satisfy the growing, worldwide demand for grain, two broad options are available  
(1)The area under production can be increased  
(2)Productivity can be improved on existing farmland.

These two options are not mutually exclusive and both will be employed to produce the additional 2.5 billion tonnes/year of grains estimated to be needed by 2050.

Increasing the production area to a large extent by bringing new land into cultivation will alter the ecological and environmental footprint, causing great damage to the entire globe

So we, Mighty Yield is committed to increasing the productivity on existing agricultural land by using new farming technologies such as hybrid seeds, synthetic fertilizers, and advanced farm machinery. We take every possible measure to avoid greenhouse gas emissions and the large-scale disruption of existing ecosystems associated with bringing new land into production.

# AGRICULTURE, A SUSTAINABLE SOURCE

It is a known fact that overall agriculture production is affected by many external factors. But with proper management and utilizing the cutting edge technology available all these odds can be controlled, resulting in a sustainable income source

## WIN-WIN FOR EVERYONE

Mighty Yield accomplishes our chosen task of achieving sustainable agriculture by farming over 100,000 acres of fertile lands on four continents. We also provide investment opportunities for those who share our passion to end world hunger, and we use that support to grow crops all over the world.

With highly fertile lands, advanced crop farming and yield estimating technologies, and decades of experience in handling agronomics, we are ensuring profit maximization for all our farmers and investors on every crop cycle.

## How our investors benefits?

- \*Higher returns when compared to a fixed deposit. A normal fixed deposit will give you a return of 6 to 7% per annum, while farming gives you a return of 45% annually.
- \* Less risky when compared to stock market. All our crops are insured and up to 75% of your capital can be repaid as compensation if you incur a loss in one season in cropping.
- \* The returns on your investment will be paid on a daily base, unlike any other agricultural Investments.
- \* Affiliate incomes like Referral and Binary commissions can be earned, creating a sustainable source of income for you.

# Agriculture With A New Perspective

Stocks can go zero,  
Bonds can go zero  
but Agriculture can't

**LET'S GIVE WHAT WE CAN**

## REGIONS

*we operate in*

- Australia
- Chain
- Brazil
- Ukraine
- Russia
- Israel
- Canada
- USA
